This chapter deals with the toxic effects of some of the common poisonous plants containing various toxic principles such as alkaloids, cyanogenic glycosides, nitrate- and nitrite-accumulating plants, strychnine poisoning, and various mushroom toxins in animals. Problems can also occur with animals in ornamental gardens, natural environments, and homes. Veterinary Toxicology is a unique single reference that teaches the basic principles of veterinary toxicology to any student at the DVM, MS or PhD level and will continue to serve as a clinical reference for practicing veterinary toxicologists, poison control centers, marine biologists, environmentalists, and animal scientists. While most comparable texts are primarily directed toward the field of human toxicology, this is the one text needed to thoroughly prepare future veterinarians on the newest approaches for diagnosing poisoning cases in all animals from chemicals and plants of a diverse Veterinary Toxicology and Clinical Principles Conference aims to bring together leading academic scientists, researchers and research scholars to exchange and share their experiences and research results on all aspects of Veterinary Toxicology and Clinical Principles Conference. It also provides a premier interdisciplinary platform for researchers, practitioners, and educators to present and discuss the most recent innovations, trends, and concerns as well as practical challenges encountered and solutions adopted in the fields of Veterinary Toxicology and Clinical Principles Conference.
