**Personal Communications**
Blank, R. R. 1995. personal communication; tour of Table and Nelson fires.

Hall, Frank. Associate wildlife biologist, Wildlife, Honey Lake Wildlife Unit. California Department of Fish and Game, Wendel, CA.

Reid, Stewart, Fisheries Biologist, U.S. Fish and Wildlife Service, Klamath Falls Fish and Wildlife Office, Klamath Falls, OR.

Shinn, Richard, Wildlife Biologist, Modoc Country. California Department of Fish and Game, Alturas, CA.
The California Wildlife Habitat Relationships (CWHR) System (Airola 1988; Mayer and Laudenslayer 1988; Zeiner et al. 1988) contains habitat ratings for each habitat type predicted to be occupied by mountain yellow-legged frogs throughout California. This model is designed as a year-round model for the mountain yellow-legged frog. Cover types. This model can be used anywhere in California for which an ARC/INFO map of CWHR habitat types exists. The CWHR system contains suitability ratings for reproduction, cover and feeding for all habitats predicted to be occupied by mountain yellow-legged frogs.
