Question: "What is the philosophy of ethics?". Answer: The philosophy of ethics is the study of the nature of the cosmos and the proper response of humanity to that nature. Philosophers analyze metaphysical theory, such as the existence of God, the responsibility of people to others, and the influence of biological impulses, and they try to determine what gives authority to morality and what ethical behavior looks like. "Ethics" usually refers to the actions of a group, and "morality" of an individual, but the two words are often used interchangeably. A recent study shows a correlation between a loss of the Y chromosome in blood cells and both a shorter life span and higher mortality from cancer in other organs. (1). Men tend to believe they are stronger. Could it be that it is the OTHER WAY AROUND? Could we (men) be the by-products of women? Could we be an incomplete version of the whole-person a woman represents? See the world with humility. Stop believing you are stronger than others. Stop believing you are the center of the world. And everything will be better. For everyone| Starting from your woman. READ ALSO
