MCQs IN CLINICAL RADIOLOGY
GENITOURINARY, OBSTETRICS & GYNAECOLOGY AND BREAST RADIOLOGY

PRABHAKAR RAJIAH
Senior Registrar in Radiology, Manchester, UK

KEY SELLING POINTS
♦ Excellent revision aid, suited to R.C.R. exam format
♦ One of six radiology FRCR question banks
♦ Companion for self-assessment, useful for senior radiologists who wish to update their knowledge
♦ Ideal combination of information and revision resource.

BOOK INFORMATION
Price: £ 12.99
ISBN: 1 904798 56X
Pub Date: October 2005
Format: Paperback
Extent: 290 pages

Multiple Choice Questions are the most common method of assessing knowledge in radiology. This book has more than 1000 questions, covering all the essential topics in Gastrointestinal Radiology. The questions have been divided into separate topics, which will enable revising the subjects on a topic basis, with due emphasis on anatomy, techniques and pathology. The questions have been designed on the format used by the Royal College of Radiologists UK, Ireland, Hong Kong, Australia and New Zealand. There is a single question with five stems, which require a true or false response. The answers and detailed explanations are provided at the end of each chapter. This book will be a valuable resource for review and practice prior to the Fellowship exams. Bibliographies have been provided for further reading.

Foreword:
Contents:

1. Kidneys, Congenital Anomalies
2. Renal Vascular Disease and Trauma
3. Renal Imaging
4. Infections
5. Obstruction, Interventions and Transplantations
6. Bladder
7. Renal Tumors
8. Adrenals
9. Imaging of Prostate
10. Imaging of Male Reproductive tract
11. Breast Imaging
12. Obstetric and Fetal Ultrasound
13. Gynaecological Diseases
14. Miscellaneous

Bibliography
Increase clinical radiology training places: Radiology is a popular specialty for foundation doctors with a high fill rate (typically 100% in recent years), a low attrition rate and sufficient capacity for training places to be significantly increased. Additional training places would reduce workforce shortages. Consultants in clinical radiology is a category included on the UK Government shortage occupation list, which recognises there are not enough UK resident consultants to fill vacancies. The addition of non-consultant clinical radiology posts to the shortage occupation list would increase the number of appropriately qualified international doctors who could support radiology service delivery across the UK.
