Gender and the Welfare State: Care, Work and Welfare in Europe and the USA
Mary Daly, Katherine Rake

DESCRIPTION

Gender and the Welfare State explores the configuration of care, work and welfare in eight countries: France, Germany, Ireland, Italy, the Netherlands, Sweden, the UK and the USA. Bringing together the most recent empirical data available, it examines the impact of the welfare state on women’s and men’s roles and power relations, and on their access to resources.

Casting a critical eye over feminist and comparative literature on the welfare state, Daly and Rake elaborate a new theoretical framework for understanding how gender relations are shaped by national welfare states. They argue that the welfare state reaches deep into people’s lives and that its effect is to be seen in the relative resources and power relations of women and men. The book traces the relationship between national welfare state configurations and care needs and care provision, the division between paid and unpaid work, the conditions of women’s and men’s participation in the labour market and gender differentials in access to the resources of money and time.

Written in an accessible style, Gender and the Welfare State brings together wide-ranging information from the major European Union countries as well as from the USA, providing the reader with essential reference material. It will be welcomed by all those interested in gender, social policies and the comparative study of welfare states.
ABOUT THE AUTHOR

Mary Daly is Professor of Sociology at Queen’s University, Belfast; Katherine Rake is Director of the Fawcett Society.

FEATURES

• Explores how care, work and welfare are constituted in eight countries: France, Germany, Ireland, Italy, the Netherlands, Sweden, the UK and the USA.

• Brings together the most recent empirical data available, in order to examine the impact of the welfare state on women and men’s access to resources, roles and power relations.

• Elaborates a new theoretical framework for understanding how gender relations are shaped by national welfare states.

• Argues that the welfare state reaches deep into women and men’s lives and that its effect is to be seen not just in how it shapes relations among different classes but in how it affects women and men’s relative resource and power relations.

• Examines care needs and provision, the division of paid from unpaid work, the conditions of women and men’s participation in the labour market and gender differentials in access to the resources of money and time.
