Late Roman Amphorae In The Western Mediterranean: A Typology And Economic Study, The Catalan Evidence

S. J Keay
Late Roman amphorae in the Western Mediterranean, A typology and economic study: the Catalan evidence. British Archaeological Reports 196. Oxford; Lamboglia, Nino 1958 Nuove osservazioni sulla « terra sigillata chiara » (Tipi A e B), in: Rivista di studi liguri XXIV, pp. 257-330; Leitch, Victoria 2013 Reconstructing history through pottery: the contribution of Roman N African cookwares, in: Journal of Roman Archaeology 26, pp. 281-306; Peacock, David P. S.; Bejaoui, Fathi; Beazreg, Nejib 1989 Roman Amphora Production in the Sahel Region of Tunisia, in: Amphores romain Mediterranee amphorae throughout the western provinces. In Britain this shift in the emphasis of amphora-borne supplies is apparent from the small but growing numbers of eastern Mediterranean amphorae found in late Roman and post-Roman contexts. These amphorae are relatively common throughout the Mediterranean area from the late fourth/early fifth century AD, and are found in large numbers at many sites.
Over the last 20 years, the geoarchaeology of ancient harbours has been a very active area of research around the Mediterranean basin, generating much palaeoenvironmental data from many sites. (More).
